

BELARUS

MR-25-01/-03

- BELARUS MR-25-01/-03 chipping machine is designed for production of chip fuel out of round and split wood, low-grade wood, waste of lumber and woodworking directly at cutting area, the chipping operation can be performed at the compartment boundaries and forest depot. After natural preliminary drying of the wood stacks to the required moisture, the chipping of accumulated refuse wood and small-sized timbers from felling can be made and at special temporary depot near all-weather road.

SPECIFICATIONS

Power machine	"Belarus" L1221 forestry tractor
Chipper	drum, multi-tool, with automatic reverse gear of feed roller and conveyer belt
Model	HEM 360 Z (JENZ)
Capacity, m ³ /h	25..60
Size of charging door, mm	790x360
Operating weight, kg	15100
Overall dimensions, mm:	
length	9240
width	2550
height	3875
Chassis	semi-trailer, single-axis, four-wheeled
Tread, mm	2125
Road clearance, mm	350
Manipulator	
for MR-25-01	GM-50
for MR-25-03	GM-42T
Manipulator load moment, kN·m:	
GM-50	45
GM-42T	31
Boom extension of manipulator, m	
GM-50	7.2
GM-42T	6.5
